SUMMARY

Full Stack Developer with 8 months of production experience building a GRC platform and standalone LMS. Builds end to end: React and TypeScript interfaces, NestJS and GraphQL APIs, and PostgreSQL data models. Experienced in RBAC, multi-tenant data isolation and application security.

EXPERIENCE

Software Engineer

CynapseAi Technologies Pvt. Ltd. | Remote | Jan 2026 – Sep 2026

- Engineered the **Training & Awareness module and standalone LMS** for Chequr, a GRC platform, covering course management with versioning, lesson builder, question bank (multi-select, true/false, single-choice), assessments, campaigns and assignments using React, TypeScript, NestJS, GraphQL, PostgreSQL and TypeORM.
- Designed **LMS RBAC and organization-level data isolation** with LMS Admin, Team Manager and LMS Learner roles, keeping LMS permissions separate from GRC permissions.
- Fixed security vulnerabilities in training workflows by enforcing **organization-scoped file authorization** and restricting external content to HTTP/HTTPS schemes.
- Delivered features across **4 modules: Policy, Risk, Incident, and Training & Awareness**, owning selected features end to end across reusable React components, GraphQL APIs, database entities, business logic and access control.

Technology Analyst Intern

Debadarsan Consulting Pvt. Ltd., Bhubaneswar | May 2025 – Jun 2025

- Led a team of 3 to build a responsive **ESG analytics dashboard** integrating SAP APIs to visualize ESG metrics and scoring.
- Developed interactive **Chart.js** visualizations and owned frontend development of the data-driven interface.

Front-End Developer Intern

Internship Studio | Jan 2024 – Feb 2024

- Created responsive interfaces and reusable components with **HTML, CSS and JavaScript**.

SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, Python, C

Frontend: React.js, Redux Toolkit, HTML5, CSS, Tailwind CSS

Backend: Node.js, Express.js, NestJS, GraphQL, REST APIs, TypeORM, JWT, RBAC

Databases: PostgreSQL, MongoDB

Tools: Git, GitHub, Docker, Postman, Jira

Concepts: Data Structures and Algorithms, Agile, Multi-tenant Data Isolation, Application Security

PROJECTS

O2Pick: Local Shop Ordering Platform

React.js, NestJS, PostgreSQL GitHub (In Progress)

- Developing a platform where customers order groceries from local shops and pick up in person.
- Implemented authentication and role-based access for customers and shopkeepers.
- Designing REST APIs and the order lifecycle: placement, acceptance, preparation and pickup.

AI-Powered Talent Bridge (BPUT Hackathon, Runner-up)

React.js, Node.js

- Implemented the frontend of an AI-powered candidate-opportunity matching platform in a 6-member team during a 36-hour hackathon.
- Created responsive interfaces for candidate search, opportunity matching and insights visualization.

HomeRental: Room Rental Platform

React.js, Node.js, Express.js, MongoDB Live Demo

- Launched a full-stack rental platform for listing, browsing and searching homes and rooms.
- Developed REST APIs with **Express.js and MongoDB Atlas** for authentication, property listings and search.

EDUCATION

B.Tech in Computer Science and Engineering | CGPA: 7.76/10

Oct 2022 – Jul 2026

BPUT, Gandhi Engineering College, Bhubaneswar, Odisha

LEADERSHIP

Head Volunteer, Tech Fest

Gandhi Engineering College

- Led a team of volunteers to organize technical events and manage participants. Won 1st Prize at the Web Development Competition among 20 teams for the official Tech Fest website.
